## **IMMUNIZATION REQUIREMENTS**

Applicants enrolled or attempting to enroll shall have received the following vaccines in accordance with the doses and age requirements listed below. If, at any time, the age of the child is between the listed ages, the child must have received the number of doses in the "Total Doses Required" column.

Institution	Age	Vaccine	Total Doses Required		
	Less than 4	This is not a recommended administration schedule, but contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirements for participation in licensed child contains the minimum requirement of the minimum requirements of the minimum requirement of th

		Diphtheria/Tetanus/ Pertussis <sup>4, 5</sup>	4 doses, with at least 1 dose of diphtheria/tetanus/pertussis-containing vaccine		
			received on or after 4 years of age if the applicant was born after September 15,		
			2000, but before September 15, 2003 <sup>2</sup> ; or		
			5 doses with at least 1 dose of diphtheria/tetanus/pertussis-containing vaccine rece		
			on or after 4 years of age if the applicant was born on or after September		
			15, 2003; <sup>2, 3</sup> and		
		1 time dose of tetanus/diphtheria/acellular pertussis-containing vaccine (Tdap)			
		for applicants in grades 7 and above, if born on or after September 15, 2000;			
	4 years of age and older		regardless of the interval since the last tetanus/diphtheria containing vaccine.		
			3 doses, with at least 1 dose received on or after 4 years of age if the applicant was		
		Polio 7	born on or before September 15, 2003; or		
		FOILO	4 doses, with at least 1 dose received on or after 4 years of age if the applicant was		
			born after September 15, 2003. 6		
		Measles/Rubella 1	2 doses of measles/rubella-containing vaccine; the first dose shall have been		
			received on or after 12 months of age; the second dose shall have been received		
			no less than 28 days after the first dose; or the applicant demonstrates a positive		
		U	antibody test for measles and rubella from a U.S. laboratory.		
2	1	Hepatitis B	3 doses if the applicant was born on or after July 1, 1994.		
<u> </u>			1 dose received on or after 12 months of age if the applicant was born on or		
<u> </u>		Varicella	after September 15, 1997, but born before September 15, 2003, unless the		
Ш	1		applicant has had a reliable history of natural disease; or 2 doses received on or after 12 months of age if the applicant was born on or after		
			September 15, 2003, unless the applicant has a reliable history of natural disease.		

Mumps vaccine may be included in measles/rubella-containing vaccine.

DTaP is not indicated for persons 7 years of age or older, therefore, a tetanus-and diphtheria-containing vaccine should be used.

The 5th dose of DTaP is not necessary if the 4th dose was administered on or after 4 years of age.

- Applicants 7 through 18 years of age who received their 1st dose of diphtheria/tetanus/pertussis-containing vaccine before 12 months of age should receive a total of 4 doses,
- with one of those doses administered on or after 4 years of age.

  Applicants 7 through 18 years of age who received their 1st dose of diphtheria/tetanus/pertussis-containing vaccine at 12 months of age or older should receive a total of 3 doses, with one of those doses administered on or after 4 years of age.
- If an applicant received an all-inactivated poliovirus (IPV) or all-oral poliovirus (OPV) series, a 4thdose is not necessary if the 3rd dose was administered on or after 4 years of age.

If both OPV and IPV were administered as part of the series, a total of 4 doses are required, regardless of the applicant's current age.

Administer 2 doses of varicella vaccine, at least 3 months apart, to applicants less than 13 years of age. Do not repeat the 2<sup>nd</sup> dose if administered 28 days or greater from the 1<sup>st</sup> dose. Administer 2 doses of varicella vaccine to applicants 13 years of age or older at least 4 weeks apart. The minimum interval between the 1<sup>st</sup> dose of varicella for an applicant 13 years of age or older is 28 days.
